Table of contents, volume 190, 1993

Number 1

K. Fichtner, W.P. Quick, E.-D. Schulze, H.A. Mooney, S.R. Rodermel, L. Bogorad, M. Stitt: Decreased ribulose-1,5-bisphosphate carboxylase-oxygenase in transgenic tobacco transformed with "antisense"*rbc*S. V. Relationship between photosynthetic rate, storage strategy, biomass allocation and vegetative plant growth at three different nitrogen supplies 1

G. Jung, A. Hellmann, W. Wernicke: Changes in the density of microtubular networks in mesophyll cells and mesophyll derived protoplasts of *Nicotiana* and *Triticum* during leaf development 10

J.M. Foster, A.M. Smith: Metabolism of glucose 6-phosphate by plastids from developing pea embryos 17

S. Berger, U. Ellersiek, P. Westhoff, K. Steinmüller: Studies on the expression of NDH-H, a subunit of the NAD(P)H-plastoquinone-oxidoreductase of higher-plant chloroplasts 25

D. Neumann, M. Emmermann, J.-M. Thierfelder, U. zur Nieden, M. Clericus, H.-P. Braun, L. Nover, U.K. Schmitz: HSP68 – a DnaK-like heat-stress protein of plant mitochondria 32

D. Becker, C. Zeilinger, G. Lohse, H. Depta, R. Hedrich: Identification and biochemical characterization of the plasma-membrane H^+-ATPase in guard cells of *Vicia faba* L. 44

S.A. Hill, J.H. Bryce, C.J. Leaver: Control of succinate oxidation by cucumber (*Cucumis sativus* L.) cotyledon mitochondria. The role of the adenine-nucleotide translocator and extramitochondrial reactions 51

K.H. Hasenstein, T.C. Pesacreta, V.I. Sullivan: Thigmonasticity of thistle staminal filaments. II. Mechano-elastic properties 58

E. Dupille, C. Rombaldi, J.-M. Lelièvre, J.-C. Cleyet-Marel, J.-C. Pech, A. Latché: Purification, properties and partial aminoacid sequence of 1-aminocyclopropane-1-carboxylic acid oxidase from apple fruits 65

P. Lejeune, G. Bernier, M.-C. Requier, J.-M. Kinet: Sucrose increase during floral induction in the phloem sap collected at the apical part of the shoot of the long-day plant *Sinapis alba* L. 71

R. Sterjiades, J.F.D. Dean, G. Gamble, D.S. Himmelsbach, K.E.L. Eriksson: Extracellular laccases and peroxidases from sycamore maple (*Acer pseudoplatanus*) cell-suspension cultures. Reactions with monolignols and lignin model compounds 75

W.J. Lucas, A. Olesinski, R.J. Hull, J.S. Haudenshield, C.M. Deom, R.N. Beachy, S. Wolf: Influence of the tobacco mosaic virus 30-kDa movement protein on carbon metabolism and photosynthate partitioning in transgenic tobacco plants 88

C.B. Osmond, J. Ramus, G. Levavasseur, L.A. Franklin, W.J. Henley: Fluorescence quenching during photosynthesis and photoinhibition of *Ulva rotundata* Blid. 97

M.T. Giardi: Phosphorylation and disassembly of the photosystem II core as an early stage of photoinhibition 107

W. Zhong, C. Schobert, E. Komor: Transport of magnesium ions in the phloem of *Ricinus communis* L. seedlings 114

A. Hager, M. Brich, I. Bazlen: Redox dependence of the blue-light-induced phosphorylation of a 100-kDa protein on isolated plasma membranes from tips of coleoptiles 120

C.A. Peterson, M. Murrmann, E. Steudle: Location of the major barriers to water and ion movement in young roots of *Zea mays* L. 127

Number 2

T. Zhu, H.L. Mogensen, S.E. Smith: Quantitative, three-dimensional analysis of alfalfa egg cells in two genotypes: Implications for biparental plastid inheritance 143

W. Brüggemann, K. Maas-Kantel, P.R. Moog: Iron uptake by leaf mesophyll cells: The role of the plasma membrane-bound ferric-chelate reductase 151

A. Renz, L. Merlo, M. Stitt: Partial purification from potato tubers of three fructokinases and three hexokinases which show differing organ and developmental specificity 156

A. Renz, M. Stitt: Substrate specificity and product inhibition of different forms of fructokinases and hexokinases in developing potato tubers 166

F.J. Tardif, J.A.M. Holtum, S.B. Powles: Occurrence of a herbicide-resistant acetyl-coenzyme A carboxylase mutant in annual ryegrass (*Lolium rigidum*) selected by sethoxydim 176

M.W.M. Burnet, B.R. Loveys, J.A.M. Holtum, S.B. Powles: A mechanism of chlorotoluron resistance in *Lolium rigidum* 182

K.S. Ramulu, P. Dijkhuis, I. Famelaer, T. Cardi, H.A. Verhoeven: Isolation of sub-diploid microprotoplasts for partial genome transfer in plants: Enhancement of micronucleation and enrichment of microprotoplasts with one or a few chromosomes 190

A. Serrano, A. Llobell: Occurrence of two isoforms of glutathione reductase in the green alga *Chlamydomonas reinhardtii* 199

G. Piro, A. Zuppa, G. Dalessandro, D.H. Northcote: Glucomannan synthesis in pea epicotyls: The mannose and glucose transferases 206

J.-K. Zhu, R.A. Bressan, P.M. Hasegawa: Loss of arabinogalactan-proteins from the plasma membrane of NaCl-adapted tobacco cells 221

J.C. Wallace, A.L. MacKay, K. Sasaki, I.E.P. Taylor: A proton nuclear magnetic resonance study of the physical changes in growing plant cell walls 227

P.A. Siegenthaler, L. Bovet: A unique protein-kinase activity is responsible for the phosphorylation of the 26- and 14-kDa proteins but not of the 67-kDa protein in the chloroplast envelope membranes of spinach 231

D. Maiti, A. List Jr., M.S. Dobres: Transcripts for a lectin-like gene accumulate in the epidermis but not the protodermis of the pea shoot apex 241

R. Zrenner, L. Willmitzer, U. Sonnewald: Analysis of the expression of potato uridinediphosphate-glucose pyrophosphorylase and its inhibition by antisense RNA 247

P. Hoppe, A. Heintze, A. Riedel, C. Creuzer, G. Schultz: The plastidic 3-phosphoglycerate → acetyl-CoA pathway in barley leaves and its involvement in the synthesis of amino acids, plastidic isoprenoids and fatty acids during chloroplast development 253

J. Frensch, T.C. Hsiao: Hydraulic propagation of pressure along immature and mature xylem vessels of roots of *Zea mays* measured by pressure-probe techniques 263

S.A. Robinson, C.B. Osmond, L. Giles: Interpretations of gradients in $\delta^{13}C$ value in thick photosynthetic tissues of plants with Crassulacean acid metabolism 271

A. de Cires, A. de la Torre, B. Delgado, C. Lara: Role of light and CO_2 fixation in the control of nitrate-reductase activity in barley leaves 277

A. Kokubo, R. Yamamoto, Y. Masuda: Galactose prevents proton excretion but not IAA-induced growth in segments of azuki bean epicotyls 284

Number 3

S. Gilroy, R.L. Jones: Calmodulin stimulation of unidirectional calcium uptake by the endoplasmic reticulum of barley aleurone 289

M.J. Hawkesford, J.-C. Davidian, C. Grignon: Sulphate/proton cotransport in plasma-membrane vesicles isolated from roots

of *Brassica napus* L.: increased transport in membranes isolated from sulphur-starved plants 297
R. Palomares, R.G. Herrmann, R. Oelmüller: Antisense RNA for components associated with the oxygen-evolving complex and the Rieske iron/sulfur protein of the tobacco thylakoid membrane suppresses accumulation of mRNA, but not of protein 305
S. Scagliarini, P. Trost, P. Pupillo, V. Valenti: Light activation and molecular-mass changes of NAD(P)-glyceraldehyde 3-phosphate dehydrogenase of spinach and maize leaves 313
P. Trost, S. Scagliarini, V. Valenti, P. Pupillo: Activation of spinach chloroplast glyceraldehyde 3-phosphate dehydrogenase: effect of glycerate 1,3-bisphosphate 320
S.J. McQueen-Mason, S.C. Fry, D.M. Durachko, D.J. Cosgrove: The relationship between xyloglucan endotransglycosylase and in-vitro cell wall extension in cucumber hypocotyls 327
M. Lauerer, D. Saftic, W.P. Quick, C. Labate, K. Fichtner, E.-D. Schulze, S.R. Rodermel, L. Bogorad, M. Stitt: Decreased ribulose-1,5-bisphosphate carboxylase-oxygenase in transgenic tobacco transformed with 'antisense' *rbcS* 332
M. Cabané, P. Calvet, P. Vincens, A.M. Boudet: Characterization of chilling-acclimation-related proteins in soybean and identification of one as a member of the heat shock protein (HSP 70) family 346
M. Sauter, R.W. Scagull, H. Kende: Internodal elongation and orientation of cellulose microfibrils and microtubules in deepwater rice 354
A. Shaish, M. Avron, U. Pick, A. Ben-Amotz: Are active oxygen species involved in induction of β-carotene in *Dunaliella bardawil*? 363
M. Syndonia Bret-Harte, L.D. Talbott: Changes in composition of the outer epidermal cell wall of pea stems during auxin-induced growth 369
M. Syndonia Bret-Harte: Total epidermal cell walls of pea stems respond differently to auxin than does the outer epidermal wall alone 379
V. Wiemken, K. Ineichen: Effect of temperature and photoperiod on the raffinose content of spruce roots 387
H.R. Schultz, M.A. Matthews: Xylem development and hydraulic conductance in sun and shade shoots of grapevine (*Vitis vinifera* L.): evidence that low light uncouples water transport capacity from leaf area 393
L. Cournac, B. Dimon, G. Peltier: Evidence for ^{18}O labeling of photorespiratory CO_2 in photoautotrophic cell cultures of higher plants illuminated in the presence of $^{18}O_2$ 407
K. Niehaus, D. Kapp, A. Pühler: Plant defence and delayed infection of alfalfa pseudonodules induced by an exopolysaccharide (EPS I)-deficient *Rhizobium meliloti* mutant 415
N.P. Money, F.M. Harold: Two water molds can grow without measurable turgor pressure 426

Number 4

X. Niu, J.-K. Zhu, M.L. Narasimhan, R.A. Bressan, P.M. Hasegawa: Plasma-membrane H^+-ATPase gene expression is regulated by NaCl in cells of the halophyte *Atriplex nummularia* L. 433
B.A. Trimming, M.J. Emes: Glycolytic enzymes in non-photosynthetic plastids of pea (*Pisum sativum* L.) roots 439
P. Geigenberger, S. Langenberger, I. Wilke, D. Heineke, H.W. Heldt, M. Stitt: Sucrose is metabolised by sucrose synthase and glycolysis within the phloem complex of *Ricinus communis* L. seedlings 440
C. Kramer, J. DiMaio, G.K. Carswell, R.D. Shillito: Selection of transformed protoplast-derived *Zea mays* colonies with phosphinothricin and a novel assay using the pH indicator chlorophenol red 454
P. Gantet, J. Brangeon, J. Grisvard, M. Dron: *Anp*, a genetic locus controlling organ-specific accumulation of anthocyanins in *Phaseolus vulgaris* L. 459
C.L. Morgan, S.R. Turner, S. Rawsthorne: Coordination of the cell-specific distribution of the four subunits of glycine decarboxylase and of serine hydroxymethyltransferase in leaves of C_3-C_4 intermediate species from different genera 468
T.P. Birner, E. Steudle: Effects of anaerobic conditions on water and solute relations, and on active transport in roots of maize (*Zea mays* L.) 474
V.M. Hurry, P. Gardeström, G. Öquist: Reduced sensitivity to photoinhibition following frost-hardening of winter rye is due to increased phosphate availability 484
C. Liedtke, G. Martiny-Baron, D. Volkmann, G.F.E. Scherer: Monoclonal antibody TOP 71 recognizes a tonoplast protein of wide distribution in the plant kingdom 491
R.R. Klein, S.J. Crafts-Brandner, M.E. Salvucci: Cloning and developmental expression of the sucrose-phosphate-synthase gene from spinach 498
B.M. Wagner, E. Beck: Cytokinins in the perennial herb *Urtica dioica* L. as influenced by its nitrogen status 511
V. Martinez, A. Läuchli: Effects of Ca^{2+} on the salt-stress response of barley roots as observed by in-vivo ^{31}P-nuclear magnetic resonance and in-vitro analysis 519
S. Kikuchi, A. Ohinata, Y. Tsumuraya, Y. Hashimoto, Y. Kaneko, H. Matsushima: Production and characterization of antibodies to the β-(1→6)-galactotetraosyl group and their interaction with arabinogalactan-proteins 525
C. Forreiter, K. Apel: Light-independent and light-dependent protochlorophyllide-reducing activities and two distinct NADPH-protochlorophyllideoxidoreductase polypeptides in mountain pine (*Pinus mugo*) 536
H.E. Zieschang, K. Köhler, A. Sievers: Changing proton concentrations at the surfaces of gravistimulated *Phleum* roots 546
R.M. Welch, W.A. Norvell, S.C. Schaefer, J.E. Shaff, L.V. Kochian: Induction of iron(III) and copper(II) reduction in pea (*Pisum sativum* L.) roots by Fe and Cu status: Does the root-cell plasmalemma Fe(III)-chelate reductase perform a general role in regulating cation uptake? 555
